Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7, 21, 29 and 31 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 7 and 21, the limitation "the resulting subset" lacks of proper antecedent basis.

Claims 29 and 31 are likewise rejected because of their dependency to claim 7.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 8, 15-19, 22 and 29-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Magnusson et al US patent no. 6,163,524.

As per claims 1, 15 and 30 Magnusson et al discloses a method and apparatus having the steps of noting the rate of a code to be allocated for an incoming call see col. 9, line 7; determining the availability of codes having the desired bit rate col. 9, lines 8-11; allocating a code in accordance with preselected rules by considering the availability of the different codes in a way leading to an optimal use of the code structure, col. 9, lines 13-17, lines 26-34.

As per claims 2 and 16, the incoming request is assigned to another code structure if it is determined that the transfer capacity would be exceeded see fig. 8 and col. 9, lines 35-45.

As per claims 3 and 17 the incoming request is blocked if it is determined that the transfer capacity would be exceeded by the call request see col. 10, lines 22-25.

As per claims 4 and 18, allocating a code of the requested bit rate if there is at least one available code of the requested bit rate see col. 9, lines 13-17.

As per claims 5 and 19, if there is more than one code of the requested bit rate available the code in accordance with preselected rules in such a way that the selection of a code to be allocated is performed so as to prioritize codes preserving a highest possible number of available higher bit rate codes see col. 8, lines 48-59 and col. 9, lines 46-67.

As per claims 8 and 22, fig. 6 shows the further step of performing reallocation if is considered that no codes of the requested bit rate exist.

As per claims 29 and 31, the steps of claims 1-14 are performed by fig. 6.

Allowable Subject Matter

Claims 6, 7, 9-14, 20, 21, 23-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
